Farmington
LD 785

I want to take this opportunity to express my unqualified support for LD 785, and the opportunities for a greater share in jobs and income that it will provide for indigenous Mainers. More than anything else, that's what I find exciting about this bill. Economic prosperity growing in all measures by 61% for indigenous people outside Maine, but only 9% for people inside it is just not right and it never has been. GIVE INDIGENOUS MAINERS AT LEAST SOME PORTION OF WHAT THEY ARE OWED!!!!

This is the dawn of the age to abolish disparities in prosperity and economic security -- whether they be between billionaires and the rest of us, or between white and indigenous Mainers. Let one of the beginnings of that process be here!
