Health care is a basic human need. We need to help our neighbors when they are sick. Keeping people healthy increases the prosperity of our communities in so many ways. The health of all people in our communities must be protected for the good of all, regardless of perceived social status. We are all worth it. Reproductive health is a critical part of persons well being. People have the right to choose their life choices, they have the right to survive and hopefully thrive. Health care is for EVERY ONE. If the federal government will not protect and serve the people, then we the people of the state of Maine must provide essential healthcare for our people.

the right to life liberty and the pursuit of happiness is our pledge.
