I am writing in favor of revenue bills LD1089, LD1879, and LD229. As a state, we should reject wasteful tax giveaways for millionaires and wealthy corporations, and create long-term solutions by raising progressive revenue through fairer tax structures. As a wealthy resident of Maine who would be directly impacted by increasing taxes on citizens with incomes over \$1 million, I want to reassure you that there are many people like me in this state who want to see fairer tax structures put in place.

I would gladly pay higher taxes to address the devastating impact HR1 is having on rural states like ours. Health insurance is becoming unaffordable for the average citizen, child care centers are over-subscribed with long wait lists, and rural health care centers are closing. We need to reverse these trends with whatever tools we can come up with.

Thank you.
