LD 335

Dear Honorable Representatives,

I urge you to support LD 335 to provide ongoing funding for essential public health services to protect and ensure the health of Maine women. This funding will bridge the huge gap caused by cuts at the Federal level. We know that the cuts at the Federal level were due to a lack of compassion and respect for the over 35,000 Mainers who access care this way in 2022. The care they receive includes cancer screenings and STI testing.

As a person of faith, I am called to stand up and for all people. First and foremost, love thy neighbor. Let's work together to create a government that protects the basic rights of life, liberty, and freedom for all. Supporting women's health does just that.
