South Portland
LD 335

Hello, Please support LD335. Reproductive rights are under an attack across our country. These services are essential to the health of women in Maine. The Trump administration and abortion opponents in Congress are using every tool available to restrict access to care. Reproductive rights are more than just about abortion! Reproductive care IS health care and should be under the care and direction of medical providers NOT politicians with a conservative, usually religious based, agenda.

Please support Maine family planning and support LD335. Thank you
