

Aura Russell-Bedder
Portland
LD 335

Please support LD335. Reproductive rights are under an unprecedented level of attack, and in Maine, patients' access to essential health care is on the line. The Trump administration and abortion opponents in Congress are using every tool available to restrict access to care.

Politicians should not be deciding which Mainers receive health care and which do not. Please support Maine family planning and support LD335.

Thank you.
