2026-02-23 13:24:32 ET	James	Saft	1804 Alna Rd.	Alna	ME	04535	Support LD 307 and People, Not Profiteers!	<p>Big new data centers could badly inflate our already near-highest-in-nation electricity costs. They could imperil our clean energy progress, help replace humans with AI agents, and use big quantities of water.</p> <p>Yet at this time, Maine has no policies to protect us from this dangerous new gold rush.</p> <p>Will you stand with the profiteers -- or with the people of Maine?</p> <p>Please stand with the people. Please support LD 307, including a temporary moratorium on large data center approvals. Before they hurt Maine forever, please take the time to review data centers risks, study the experiences of other states, and adopt policies that put Maine and Mainers first!</p>

2026-02-23 08:41:20 ET	Maeve	Shea	16 Enterprise Dr	Brunswick	ME	04011	Please support LD 307	<p>As an engineer in the electric transmission line field, I personally have a lot to gain (like job security) from the data center boom. But I am still skeptical and unsure of whether this is the right choice.</p> <p>I have seen firsthand how data centers are impacting the wants and needs of utilities all across the country. I do not like the idea that we will be reshaping our T&D grid to accommodate data centers instead of working towards clean, reliable energy for everyone. I do not like the fact that rates will be increased on individual consumers to support new infrastructure that will profit big corporations. That isn't fair, and it isn't right.</p> <p>Not to mention the logistics of how data centers would be reasonably added to our grid. In New England, we don't have huge open swaths of land where we can have 200-ft ROWs for 765kV transmission lines like they do in Colorado, Texas, and Wyoming. We have narrow, congested utility corridors with a ton of vegetation which have limited options for extra-high voltage transmission. Without EHV transmission, I really doubt that our grid can handle the added load of data centers while still meeting the needs of everyday consumers.</p> <p>Maine has been ahead of the curve on so many instances when it comes to keeping big corporations from making money in our state at our expense. Please support LD407, including a temporary moratorium on large data center approvals. We need to watch and see how this plays out. We need time to decide if this works for us, or if it just makes money for out-of-state companies. Please do not fall to the pressure of people saying we have to act RIGHT NOW or we will MISS OUT!!!</p> <p>That kind of sales push sounds like a scam to me.</p>

2026-02-23 14:06:23 ET	David	Souers	PO Box 314	Friendship	ME	04547	Support LD 307 and People, Not Profiteers!	<p>Maine residential & small business energy customers should not pay a penny more to subsidize high energy consumers who require new energy sources, supplies and grid infrastructure. Rather, they should be the ones to invest in & pay for the energy growth & distribution that they need. Where this benefits residential & small business customers with more reliable service & reductions in energy costs, we who have paid the highest rates over time should be able to benefit with more affordable rates.</p> <p>At the same time, growing energy demands by big business consumers should also be accomplished with safe, green renewable energy sources, not with polluting fossil fuels. Big consumers should not be allowed to worsen climate change, rather they should be the energy investors that expand & develop our clean energy future.</p> <p>Big new data centers could badly inflate our already near-highest-in-nation electricity costs. They could imperil our clean energy progress, help replace humans with AI agents, and use big quantities of water.</p> <p>Yet at this time, Maine has no policies to protect us from this dangerous new gold rush.</p> <p>Will you stand with the profiteers -- or with the people of Maine?</p> <p>Please stand with the people. Please support LD 307, including a temporary moratorium on large data center approvals. 2026-02-20 18:58:07 ET	Alexander	Gardullo	172 Moody Mountain Rd.	Lincolnville	ME	04849	Please Support LD 307 and a Moratorium on Maine Data Centers!	<p>Data centers have become the backbone of our global economy, but their rapid proliferation comes at a significant environmental cost. All data centers worldwide combined consume 32% more electricity than all of Britain. Power generation is already the largest source of carbon dioxide emissions in the world, and the energy required to keep these essential data centers operational, while staggering, is only poised to increase dramatically.</p> <p>The advancement of artificial intelligence (AI) requires energy-intensive data processing, compounding an already alarming pollution problem. In a few short years, data centers—which run thousands of servers nonstop—have doubled the amount of energy they use. Harm is already being done, with communities near large data centers regularly exposed to dirty air and water that cause respiratory issues and other health problems.</p> <p>Long-term solutions, such as transitioning to renewable energy sources, are critical, but immediate action must be taken to mitigate the impact of data center pollution. Emissions capture and control technology presents a viable solution that can be implemented now to minimize the harmful effects of data center emissions.</p> <p>Please stand up for Maine ratepayers and our environment, not big data center developers. Our electricity rates are already far too high, and we deserve decisions that are made in the light of day.</p> <p>Please support LD 307 with a temporary moratorium. Press pause NOW on the data center gold rush, allowing time to set up a commission, study best practices, and put good policies in place to protect Maine people!</p>

Please support LD 307, including a temporary moratorium on large data center approvals. Before they hurt Maine forever, please take the time to review data centers risks, study the experiences of other states, and adopt policies that put Maine and Mainers first!</p>
2026-02-20 18:14:22 ET	Evan	Goodkowsky	19 FLOOD AVENUE	Wiscasset	ME	04578	Support LD 307 and People, Not Profiteers!	<p>Big new data centers could badly inflate our already near-highest-in-nation electricity costs. They could imperil our clean energy progress, help replace humans with AI agents, and use big quantities of water.</p> <p>Yet at this time, Maine has no policies to protect us from this dangerous new gold rush.</p> <p>Will you stand with the profiteers -- or with the people of Maine?</p> <p>Please stand with the people. Please support LD 307, including a temporary moratorium on large data center approvals. Before they hurt Maine forever, please take the time to review data centers risks, study the experiences of other states, and adopt policies that put Maine and Mainers first!</p>
2026-02-20 20:56:10 ET	Mary	Finn	258 Old Sheepscot Rd	Wiscasset	ME	04578	Please Support LD 307 and a Moratorium on Maine Data Centers!	<p>Please stand up for Maine ratepayers and our environment, not big data center developers. Our electricity rates are already far too high, and we deserve decisions that are made in the light of day.</p> <p>Please support LD 307 with a temporary moratorium. Press pause NOW on the data center gold rush, allowing time to set up a commission, study best practices, and put good policies in place to protect Maine people!</p>
