Friends of Merrymeeting Bay
LD 2187

Senator Tepler, Representative Doudera and members of the Joint Standing
Committee on Environment & Natural Resources,

Locking in actual existing improved water quality on the Androscoggin River
between Worumbo and Gulf Island Pond dams will help the local economy and the
environment. Please support an LD 2187 amendment locking in existing Class B
conditions through a classification upgrade for this section of river. Both federal and
state laws prohibit backsliding in water quality, and ensuring classifications reflect
actual conditions is how this is done.

Thank you!

John Holt
