

Judith Clarke  
Dresden  
LD 2187

Senator Tepler, Representative Doudera and members of the Joint Standing  
Committee on Environment & Natural Resources,

Locking in actual existing improved water quality on the Androscoggin River  
between Worumbo and Gulf Island Pond dams will help the local economy and the  
environment. Please support a LD 2187 amendment locking in existing Class B  
conditions through a classification upgrade for this section of river. Both federal and  
state laws prohibit backsliding in water quality and ensuring classifications reflect  
actual conditions is how this is done.

Thank you!
