

Christina Martin  
Los Angeles, CA  
LD 2187

Senator Tepler, Representative Doudera and Members of the Joint Standing  
Committee on Environment & Natural Resources,

Please support the LD 2187 amendment locking in existing Class B conditions through a classification upgrade for the section of the Androscoggin River between Worumbo and Gulf Island Pond dams. Locking in actual existing improved water quality in this area will help the local economy and the environment. Both federal and state laws prohibit backsliding in water quality so it is important to ensure that classifications reflect actual conditions. Thank you for your time and consideration.
