Bowdoinham
LD 2187

I am in support of a LD 2187 amendment to preserve existing water quality through reclassification of the Androscoggin River from C to B between Worumbo and Gulf Island Pond dams. Because intensive sampling last summer by Friends of Merrymeeting Bay at ten sites in this section of river showed easy Class B compliance 100% of the time, I'm asking you to please support amendment language locking in the improved water quality
