This bill is redundant as the legislature has already authorized millions for abortion providers. Maine needs more doctors as they are moving or retiring at an alarming rate. Use tax dollars to benefit all of us, not just a few. Provide incentives to get and keep specialists as well as PCPs. Curb the conglomerates that are buying then closing facilities. If anyone in my area has a medical emergency, it takes 45 minutes or more to get to a hospital. And that's if the bag is packed; the weather is nice; and the roads aren't being worked on! It's probably worse in more rural communities. Please do the most good.
