

Kelly Danielson  
Buckfield  
LD 2174

Dear Members of the Environmental and Resource Committee,  
I am needing to get ready to go to work this morning but this bill LD2174 came to my attention this morning and so I have quickly figured out how to submit this testimony.

I urge you to not pass LD2174. I am against any bill that would take away local municipal ordinances. Maine is not a "one size fits all" state. Local towns people come together to create and pass environmental ordinances that would best suit their towns. This bill will override the will of the people in many municipalities. Therefore, I urge you to dismiss this bill.
