Jonesport
LD 2187

To the Environmental and Natural Resources Committee regarding LD 2187,

I live in Jonesport, Maine, on the shores of the pristine and unique Chandler Bay which is being considered for a classification upgrade.

I am supporting LD 2187 however I am requesting an upgrade of Chandler Bay's classification to its deserved SA designation.

Four years of testing has shown this incredible water body meets and even exceeds the scientific requirements to qualify as SA.

Chandler Bay's valuable, unmatched and pristine marine habitat deserves the highest level (SA) to be preserved and protected.

Chandler Bay has shown that it supports marine habitat, fisheries, recreation and shellfish consistent with designated uses of Class SA waters.

Thank you for your thoughtful consideration of this matter.
