Topsham  
LD 2187

To Whom it may concern,

I am writing on behalf of proposition LD 2187. Rivers are a source where life begins. They support and enrich the quality of all living beings. The Androscoggin River is a gift we are fortunate to have in Maine. We have abused this river, dumping toxins in its waters poisoning the life it supports, depleting the resources it provides so essential for life. We in Maine have been and should continue to be ardent advocates for clean water and air. To me this feels more imperative then ever. Today, the leaders of our country are destroying so many protections that keep our waters clean and air fresh. Let's not join their effort. Let's become strong advocates for life and pass LD 2187, a bill that asks us to protect and enhance the water quality of the Androscoggin River. Thank you, Adelaide Trafton
