As someone who grew up lower class in Maine, I never really thought higher education would be accessible to me. That was until 2021 when I discovered the opportunity to attend school for free through the state. Without that I would not be in the place I am now and attending school at York County Community College. It has also allowed me to really figure out what I wanted to do and what my purpose is. I am writing my testimony to show support for proving funding for those who need it. Everyone deserves to receive education.
