Please direct funds to support for women. Please direct funds to support children. Please consider your answer, if you believe women men and children in Maine need support; a one day old child, deserves protection, then vote for giving that child time to grow from one day in utero its path through the birth canal.

Direct money towards strengthening families — reopening maternity wards, supporting birthing centers, and expanding adoption and foster care — not underwriting an industry that measures success by the number of abortions performed.
