

Senator Ingwersen, Representative Meyer, and Members of the Committee on Health and Human Services, I'm Eli Grober, I live in Portland, Maine, and I urge you to vote Ought to Pass on LD 335.

I'm a new dad. I want my daughter to grow up in a world in which her access to healthcare doesn't depend on her bank account or her zip code. You can make that world a reality in Maine. You can pass LD 335 and ensure all Mainers have access to the care they need, regardless of their ability to pay.

The services Maine's family planning providers offer are deeply undervalued, and have been for decades. Providers face more obstacles than ever before, from increasing costs of delivering care to insufficient and stagnant reimbursement rates.

At the same time, attacks on reproductive health care at the federal level also aim to restrict access to primary and behavioral health care, which family planning services provide to tens of thousands of patients in Maine every year.

When my daughter grows up, will you explain to her why some people have access to the care they need, and others have been shut out? Will you tell her why politicians in Washington got to make decisions about her health? What about your own kids, what will you tell them?

You have an opportunity to build a partnership between the state and providers to safeguard against future attacks on access to care at the federal level. You have an opportunity to build a world in which our children don't have to ask those questions. Keep Mainers' access to healthcare dependent on their need, not on politics.

Please vote Ought to Pass on LD 335. Thank you.

Eli Grober
Portland
LD 335

Senator Ingwersen, Representative Meyer, and Members of the Committee on Health and Human Services, I'm Eli Grober, I live in Portland, Maine, and I urge you to vote Ought to Pass on LD 335.

I'm a new dad. I want my daughter to grow up in a world in which her access to healthcare doesn't depend on her bank account or her zip code. You can make that world a reality in Maine. You can pass LD 335 and ensure all Mainers have access to the care they need, regardless of their ability to pay.

The services Maine's family planning providers offer are deeply undervalued, and have been for decades. Providers face more obstacles than ever before, from increasing costs of delivering care to insufficient and stagnant reimbursement rates.

At the same time, attacks on reproductive health care at the federal level also aim to restrict access to primary and behavioral health care, which family planning services provide to tens of thousands of patients in Maine every year.

When my daughter grows up, will you explain to her why some people have access to the care they need, and others have been shut out? Will you tell her why politicians in Washington got to make decisions about her health? What about your own kids, what will you tell them?

You have an opportunity to build a partnership between the state and providers to safeguard against future attacks on access to care at the federal level. You have an opportunity to build a world in which our children don't have to ask those questions. Keep Mainers' access to healthcare dependent on their need, not on politics.
