I am disabled person who sometime find it difficult to read ballot questions due to the language written on it such as the two Referendum questions on the 2025 Maine ballot. Voting should be made easy to read for everyone including the disabled and elderly.

I am for the proposed legislation. I want to submit testimony to keep the original language draft as is not to make any changes recommended by the Secretary of State nor anyone else. The original language with this initiative is very clear to me and the proposed changes is very unclear and creates confusion.
