The wordsmithing of this Bill is ridiculous. Why can't a ballot question be simple? Why does it have to be so complicated? Same thing was done with the Voter ID question. Meant to confuse the public into voting a certain way.

Male gender (men, boys) should not be playing in female (girls, women) sports. Transgender or otherwise. Biology tells us that when we're born, we have certain attributes that make us a male or a female. All the surgeries and hormone treatments in the world won't change that. A man can dress like a woman to say that's what he is, but there's no way he's going to possess a womb, or have a period every month. Testosterone levels in males makes them the stronger sex. So, when they're playing on a girls team, they're more likely to beat the girl, thus challenging her scholarship possibilities and probably creating doubts in her mind of her confidence levels. Please keep males out of females sports.

And change the wording of this Bill. This wording is so stupid. Very hard to discern the right answer!

“Do you want to change civil rights and education laws to require public schools to restrict access to bathrooms and sports based on the gender on the child’s original birth certificate and allow students to sue the schools?”
