LD 2239

Dear Committee

I am a psychologist and have worked with numerous schools and hundreds of adolescents and their families. Bill 2239 is taking a punitive approach toward individuals who deserve and need compassion and support. I have also been a college athlete and coach. This experience confirms what we all already know - masculine hormones impart a biological advantage in physical tasks. For this reason I do support some restrictions on biological males being able to compete in women's sports unless they are on testosterone suppressing medications. However the bathroom provisions are unnecessary and punitive. Make a single stall bathroom that is unisex and the "problem" is resolved
