

For the record My name is Paul Gabriel Gosselin. This is my Testimony before GOD.

Yes, on LD-51

I started taking care of folk as a military medic 1980. I continued my calling and went to medical school where I realized the practice of "medicine" was not what I thought. Moving forward I still found great meaning in taking care of people. Fast forward to the last few years many of my colleagues have dropped out of medicine. Many continue using dangerous protocols to "treat" victims of this terrorist act.

16 months ago, I began to see an uptick of sick folk. My days were full, and I spent many nights reaching out to patients and calling folk across the country attempting to get these medications for this illness. Some of these folks were spirited attorneys who simply needed a written prescription for ivermectin for their clients who were quickly waning in the hospital. Many others were denied medical treatment because they were not sick enough to be bothered with. Safe and effective remedies like ivermectin were denied by the majority of pharmacist. The very pharmacists who refused to fill these lifesaving medications doled out dangerous experimental injections without informed consent or medical training.

My office was visited by an FBI agent accompanied by a border patrol officer as if I was committing some crime. Later I began to get calls from Border patrol officers who wanted letters of exemption from the covid jab. Some of my patients were assaulted by medical professionals for not wearing masks in the empty hallway leading to my office. **The Fear was palpable, and the cowards were numerous.**

Gradually over the next few months more and more folks came into my office looking for letters of exemption. The lions share came from health care workers and dental offices. Many believed that they faced loss of their livelihood. They also realized they may be facing a life altering decision. After several weeks the medical director of the local hospital Steve Diaz informed one of the hospital employees that he would was after me. A few days later I received a subpoena from my medical board. Soon thereafter, on the day before Thanksgiving, my license was cancelled, and hundreds of patients were left abandoned.

The Assistant Attorney general lasts words before the medical board cancelled my medical license was "we must make him think like us. Orson wells would be proud.

*"To study the phenomena of disease without books is to sail an uncharted sea, while to study books without patients is not to go to sea at all." William Osler"*
