

I am here to support LD 51, There are doctors in this room providing ethical research and data to prove that these vaccines do harm to enough children that warrant an immediate stop to LD 798. I question the efficacy of this governing body and their ability to discern or weigh ethically or morally, decisions regarding a for profit corporate health care system that has a conflict of interest within it's relations to the government and the pharmaceutical industry.

LD 798 strips away our freedoms and goes against our constitutional rights and those of our children.

LD 798 weaponizes my personal medical choices, my religious and philosophical beliefs against me and our children. I have had my character brought into question as I appose these invasions of privacy and decisions about my health. I have been accused of being a selfish and dangerous person as family and friends listen to marketing campaigns and fear propaganda released by media and big Pharma.

This country was founded on the freedoms that you have no right to legislate away. You now have, with the passing of LD 51, a way to correct this obvious discrepancy of scientific facts, morality, and ethics.

I believe it is your moral and ethical responsibility to stop legislating and mandating these life threatening vaccination laws - LD 51 will attempt to stop further harm.

A vaccination is a medical procedure. What are the ethical, moral, and legal responsibilities of the government, who support vaccine laws that have removed liability, support, or recourse for the injured or dead?

Why are pharmaceutical companies and medical facilities being protected and not the children? As the number of required vaccinations increase, so does risk and the need for informed consent. Are you certain that the patient or parent have a clear understanding of the possible harm, the potential risks, the side effects of the 75 plus vaccines you/CDC recommend?

Our children - and adults, are being mandated to subject their bodies to an experimental protocol for COVID, as it is added to the schedule.

When a pharmaceutical company, school, or government has no liability for the injurious results of it's recommendations, which are now, with more evidence being provided daily, leading to a correlation of higher rates of autism and other debilitating and life threatening conditions, leaving it's population at the mercy of an immoral act. Please correct this and vote LD 51. Thank you.
