

Good morning.

Speaking in favor of: LD51, LD 869, LD 1098, LD 1148, LD 1209, LD 1228

I am asking you today to vote Ought to Pass on these Bills which in total or a combination thereof, are designed to repeal LD798 and restore to the Citizens of Maine, their Religious and Philosophical Exemptions to Immunization Requirements and to prohibit vaccine mandates.

Over the last 2+ years there has been an accumulation of overwhelming evidence clearly proving that the so-called COVID Vaccine is neither safe, nor effective. Millions of people have been injured or have died from this vaccine. I know of many people who have been injured and several who have died.

We now know the truth about COVID Vaccine mandates and the immeasurable harm they have caused to our country and our children's education. The CDC is finally recognizing natural immunity and that those with natural immunity should have equal status as those who are vaccinated. Why did it take so long? It is time to stop the madness and end the mandates.

At the heart of this matter is Individual Liberty and Medical Freedom. In the United States each individual has certain fundamental freedoms – including Freedom of Religion. ^{The 1st Amendment} ~~It~~ forbids Congress from both promoting one religion over others, and also ^{shall not} restrict an individual's religious practices. These freedoms CANNOT be taken away. LD798 is a violation of the 1st Amendment of our Constitution and the Nuremberg Code.

Thank you for the opportunity to speak and please vote Ought to Pass on these Bills.

Respectfully,

Virginia Farrin

Boothbay Harbor, Maine
