

5-3-23

Hi my name is Lorraine Bissonnette. I am a 18 year employee at RPC. my experience at RPC is as follows. I spent 25 months on light duty due to an assault on myself. resulting in hip surgery where my labrum was shredded and they pulled out 3 large bone fragments off the top of my femur. In the future I will need a hip replacement. I also was bitten 3 times, had my hair pulled out x1 have had countless scratches and clawing of different body parts. I have been punched in the face resulting in 2 fat lips, punch in the shoulder dislocating it. Also have had numerous bruising to different parts of my body. For me having 25 or 55 will give me the opportunity to decide to retire sooner than later where I will have time to heal my mind body + soul before the end of my life. I would like to. Add that the verbal abuse is severe at times

Thank You

  
MHW 2

Also I have witnessed many assaults on fellow coworkers resulting in long term care. Such as rods and screws put in ankles of a coworker and rods + screws in 1 coworker leg. Multiple bites, hair pulls, teeth knocked

out, multiple shoulder injuries and many more.  
It does take an emotional toll on us to witness  
some of these assaults here. You are welcome  
to reach out to me for more information if  
needed
