

LD 16A Kelsie Goodwin

**Abortion is not a single person issue. Life begins at conception, this is confirmed by science. The impact of a single abortion has dire and drastic consequences. Please hear my husband's testimony.**

**One day about 6 years ago before he and I met, my husband had a one night stand with an addict. A child was conceived from that encounter and my husband knew the unborn baby was his. From that came a purpose for him and he wanted to be the best father he could. He quit smoking, drinking and doing drugs and started following the Lord Jesus Christ. The woman didn't believe that the child was his and didn't want to change and would take him to prenatal appointments and seriously discuss abortion options with the physician. As a man my husband had no say in whether his child lived or died. He begged and pleaded for his daughter's life and the mother finally relented. If that woman had chosen to destroy life, my husband wouldn't have changed, I would never have met my wonderful husband (and if I did, we probably wouldn't have liked each other) and my beautiful, brilliant daughter. I gladly claim her as my own and we are very blessed by God. Abortions not only kill the unborn and traumatize women, it has a disastrous ripple effect on everyone. We must be prolife and profanity. Please vote against this radical Bill that allows for the greatest genocide of our time**
