

Life, liberty, and the pursuit of happiness

These are the unalienable rights afforded us by our constitution.

Today you are debating the issue of Life but many in this legislature believe some don't deserve life. Is there any common sense left in the legislature, in the beginning there was a clump of cells, they are growing so that means they are alive. As these cells continue to grow their shape begins to take shape, by the way you and I were once the same, so we know that it is a human being. Then suddenly one person decided to try to extinguish a whole race of people by killing their unborn children. They tried to convince people that their unborn children was just a clump of cells well we know it's more than that don't we. They formed a group that is now a business that charges money to kill your baby before it is born, we know they sell some of the body parts. They

never talk about the psychological effects of an abortion to the former mother; they don't want the prospective mother to see a sonogram because they will be able to see the baby in the womb and probably change their mind about terminating the pregnancy thus giving Life to their baby. In fact they don't even call it a baby because doing so would acknowledge that it is a human. That baby does have the right to Life, liberty and to pursue it's happiness. Neither you or I have the moral right to take that life just as we didn't have the right to take the lives of slaves in our history.

Abortion is not as some call it the right to choose. That choice was made when those two people decided to have sex to begin with. The pregnancy was a result of a choice. It is wrong to eliminate that life as we have no idea what or who that unborn life would grow up to be or do. Is that unborn baby the one that will grow

to be a doctor that will save your child from some catastrophic disease. We do not know that do we.

In the last election cycle Gov Mills said she was not going to change the current abortion laws in Maine evidently that was not true since she is now proposing the most open abortion laws that go against any form of morality. To be able to abort (kill) an unborn baby minutes before it is born is unconscionable. That baby has a right to live. I must ask have any of you seen an abortion if you did you would not like it. To see a baby torn apart a limb at a time is enough to turn your stomach.

It's time to stop the Hypocrisy when it comes to abortion. When a mother and unborn baby are killed the perpetrator is charged with two murders not one. It is the killing of a human being you know it and I know it .I implore you in the name of decency to vote against any new

abortion laws being presented to the legislature this bill LD1619 was conceived by satin himself, I urge you to vote ought not to pass on LD 1619

Thank you

Andre a beausoleil
