

What I saw yesterday is a historic gathering, with young and old...uniting as one VOICE saying...We have had enough!! NO more innocent bloodshed on our land and on our hands.

This is where we draw the line in the sand! We the people have a righteous indignation towards those that can lie bold face to us and tell us that this bill is for reproduction protection, that's not the truth at all As we already have women protected under our law.

We can not and will not remain silent, and just let you folks sign over this death decree, hence the 700 plus testimonies you've heard today.

There is a moral outcry from within these very walls of our state house as thousands of Maine residents gathered yesterday and today, From all over, waiting all hours of the night to let our voices be heard that we do not accept this Late Term Abortion bill!

We ask you please hear us, Life is sacred, life has Value. We were all knitted together inside our mothers womb. That should be the safest place for any baby. This bill does not have the best interest of the mother or child in mind. This bill will kill one human while leaving the other with such emotional scars and damage that that only God himself can heal, but this is avoidable. So please do your part to help keep women safe and protected from this late term abortion law.

Please vote ought not pass on LD 1619

Thank You.
