

Senator Carney and Representative Moonen, Honorable Members of the Joint Standing Committee on Judiciary,

My name is Bob Roemmich, and I am a resident of Bangor. I am here to testify in opposition to LD 1619.

First of all, I would like to raise a question for all to think about. How is it that, due to medical progress from the 1960's to now, doctors can actually operate on a human life inside the womb of the mother and yet when it comes to canceling that life, which many say is only a fetus, doctors can deny that life any chance of survival?

This bill is very wrong for Maine. All life should and must be considered sacred. According to the many people that I have talked to in the medical field, this decision to have an abortion to help the health of the mother is a very lame excuse to end a life. If there are any complications, it usually comes after the baby is born and can be addressed medically in a very quick manner.

My story is that when my birth mother was carrying me, she underwent a couple of surgeries that were medically needed. She was also advised that I would be still-born. I assure you that I was not stillborn. My wife would not have me as her husband and my children would not have me for their father. This bill, if it were in place at the time of my birth, would have ended my life before I ever saw the light of day.

When considering an unlicensed person performing any abortion procedure as a result of this bill, the accountability factor would be non-existent. All people must be responsible for their actions in regards to taking lives, whether it be in a doctor office, hospital, or the street.

I also oppose LD-776 as well as LD-1343.

Thank you for your time and please strongly consider a "NO" vote or a "ought to not to pass" vote on LD-1619.
