RE: Testimony in Opposition of LD1619

Senator Carney, Representative Moonen, and Honorable Members of the Judiciary, my name is Aline Poulin and I am a resident of Waterville. I am here to testify in opposition to LD1619.

HEAR YE! HEAR YE! HEAR YE!

The unborn of this nation, ages 3 weeks to 9 months, hereby referred to as "human species" having endured 40 years of mutilation, dismemberment of limbs for the purpose of sale to scientific organizations, and subjected to untold pain and suffering endured when taken from their natural habitat (mother's womb) and deprived of its natural space for growth, food, water, light or other nutritional, and there rightful place on earth, having thereby met the criterium to be considered as candidates as a most imperiled species under the Endangered Species Act of 1973 and Amended Law of 1978. Having met the criteria, this Nation must consider for conservation, funding appropriation necessary as requested in the Biden Administration in 2022, that Congress raise the spending for protection of endangered species to 700 million dollars to carry out actions that will stop further destruction or adverse modification of critical habitats (mother's womb) that will carry these endangered human species to full term and life as determined by the Power of God.
