This message originates from outside the Maine Legislature.

Dear Veterans and Foreign Affairs Committee

The LD 1578 bill should aught not to pass. For all the people who have individual interest such as the lobster industry, politicians would show us no interest which would disenfranchise our vote and it would allow people in other more populated states to be able to rule what is decided within small populated states. All small populated states would loose their equivalent vote for the presidency and our interests would be lessened. Please DO NOT PASS LD 1578.

Sincerely,
Marlene
