Subject: Stop harmful fossil fuel gas: support LD 2077

This message originates from outside the Maine Legislature.

My 4 year old daughter cried when she saw the snow washed away by the rain. While this has always been a common sight in April, it was January. Watching my child have to grapple with the climate crisis in real time is heartbreaking. The latest storm washing away beaches and buildings where I spent so much time with her as a newborn was even harder to watch. We must stop the expansion of fossil fuels if we want to have a future Maine that looks even remotely like the Maine of our childhoods.

LD 2077 can help. I would like the state to recognize the reality of the burdens gas places on our environment, health, and wallet, and figure out a smart way to transition away from fossil fuels. I don't want to pay for the continued expansion of a system that threatens our climate. Maine can't be a climate leader and allow gas utilities unlimited growth at the same time.

The climate crisis is already threatening our survival. Please support LD 2077 for the sake of all Mainers and our families.

Gratefully,

Julia Brown
