Subject: Let's move away from fossil fuels in our homes: support LD 2077

This message originates from outside the Maine Legislature.

It is abundantly clear that climate change is hurting Maine, right here and right now. We ended 2023 with a storm that devastated our neighborhoods and started 2024 with yet another that flooded our streets (and my basement). These reminders of the worsening impacts of climate change are a testament to the fact that we need to move off fossil fuels today.

LD 2077 can help. I would like the state to recognize the reality of the burdens gas places on our environment, health, and wallet, and figure out a smart way to transition away from fossil fuels. I don't want to pay for the continued expansion of a system that threatens our climate. Maine can't be a climate leader and allow gas utilities unlimited growth at the same time.

If the storms are this bad today, I can't imagine what they will look like tomorrow, in a year, or even 10 years down the line. But I know that I don't want to wait and find out what that looks like. Please support LD 2077 for the sake of all Mainers and our families.

Gratefully,

Marcia Skerry
