

LD 227 An Act Regarding Health Care in the State - Vote Ought Not to Pass

I am against the bill to make Maine a sanctuary state for all abortion and transgender care for minors, calling it "Legally Protected Healthcare".

Here are some definitions:

- Abortion: the direct and intentional killing of an innocent, pre-born human being
- "Gender-affirming care" of minors: the chemical poisoning and/or genital mutilation of children with serious mental health issues about their gender, that have life-long, detrimental consequences and are encouraged and performed by irresponsible, wreckless adults. These adults call themselves healthcare professionals.

Here's what you are advocates for:

- State-sanctioned kidnapping of minor children against their parents' will
- The evils of abortion and "gender-affirming care"
- Pushing agendas that make families and pregnancy the enemy, and children think it's healthy and good to deny their natural human identity as biological males and females.
- Tying the hands of law enforcement to come to the aid of children who may be under duress from nefarious actors meaning harm to them..

Here's what you are doing to families:

- Weaponizing government against parents and their children
- Encouraging children disrespect and dishonor their parents
- Weaponizing the medical establishment against parents and their children
- Infecting our children with the evil ideology of abortion and transgenderism
- Overreaching the state's authority into family health matters

Here's the nefarious activity/outcomes you are supporting:

- More human trafficking of young girls here in Maine and becoming a sanctuary for this terrible activity
- More domestic violence and abusers finding a haven in Maine with underage girls.
- Higher suicide rates in Maine from kids buying into the transgender contagion and lie and compromised Maine medical communities giving irreversable Frankenstein Care.

Here is what you will be remembered for with this legislation:

- You were more concerned with radical ideology than the welfare/good of families
- You were more concerned with power than welfare/good of Maine's children
- You were very short-sighted by drawing bad actors and activity to our state
- You brought divisive legislation to Maine families
- You brought state-sanctioned kidnapping to Maine
- You used Maine taxpayers money to support all of this activity

Maine Families Deserve Better. VOTE OUGHT NOT TO PASS ON LD 227

Dennis Arbour, China, Maine
