

Senator Bailey, Representative Perry and members of the Health Coverage, Insurance and Financial Services, I am Krista White and I live in Turner, Maine. I am here to testify against LD 227, An Regarding Health Care in the State which is sponsored by Representative Perry.

America has a heart problem, she is soul sick. The created have forgotten the Creator. Here on this sacred property we are discussing surgeries for children and abortions up to nine months all without parental consent. If this day was a snapshot given to a Maine soldier from Deer Isle going off to fight in the Civil War to free slaves or this day's headline given to my sweet Father-in-law who fought in the Korean War, that someday blood sweat and tears would allow for such heinous crimes against children, I think they could not endure. For when the created know they were fearfully and wonderfully made in the image of God and life is a greater plan than we could ever dream up, the heart of man can beat in step with divine purpose. Why always be searching for something better, always fixing and creating in darkness our own path forward We need to let Light in! It is the greatest form of disinfectant. There is a lot of darkness here? Ignoring parental rights is dark, it is the first sign of grooming a child. Joshua Chamberlain in 1879 stood on this ground under seize at our State Capitol and declared if the people wanted to kill him then kill him but he was going to stand for what was right. I too say this is a hill worth dying on. I know my Creator would agree, He died on a hill too.
