**Subject:** LD 227 An Act Regarding Health Care in the State.

**This message originates from outside the Maine Legislature.**

Members of the committee:

I and my wife are 91 years of age and live in an Assisted Living environment due to the wife's illness of diagnosed Alzheimer's. I am used to dealing with fantasy and unrealistic scenarios at this point in my life. This bill certainly fits the definition of fantasy.

One of the benefits of old age is that one get to observe the arcane ideas that show up each Legislative session in the form of a bill that seems to stretch the evil imagination of evilness beyond belief. Such is the proposed LD 227 as it openly tries to further the evil dreams of Satan and the WOKE agenda. It also removes the responsibility of child rearing from the parents to that of government.

Just look at our sad situation with DHHS child care or the mental health program that allowed the recent mass shooting in Lewiston. One could fill books with stories of governmental failures that give "we the people" nothing more than extreme cost and dangerous outcomes. An example is the PFAS threat in Central Maine that apparently was ignored by the Environmental Protection Agency. We need less government not more. History is full of government failures. Why on earth add to them?

It is fool hardy to think that government should have control of our children's health and sexual identification. Only God and their parents should be the deciding decisions makers of children's lives. This bill is dangerous in many ways and I ask that you listen to this God fearing old man and give it a unanimous "ought not to pass."

Sincerely,  
George A. Fogg
