Jonesport
LD 227

I am opposed to the passage of Maine LD227. The state of Maine has one of the Nation's worst records for protecting at risk, vulnerable, abused and neglected children. To even consider adding children to the currently failing and abysmal system here in Maine is unconscionable and reckless. We do not have the financial means to hire competent professionals who are capable of offering even marginal assistance to children who will need that assistance for the rest of their lives. Offering abortion services is another unfortunate scheme that truly only benefits the research facilities who will pay for aborted fetal pieces, parts, stem cells, etc. Maine should not be associated with the immoral activities of Planned Parenthood and any facility which traffics human fetal material. Please consider the ramifications and realities of this bill.
