

Good afternoon Epstein's Island North, my name is Roger Moulton, I reside in Livermore Falls and I am testifying against this bill and it's insane contents.

I'm honestly really confused with this entire bill. Your party has spent years screaming science at the top of your lungs for a vaccine with very unsettled science. But today we are talking about ignoring the very core concepts of biology and the role chromosomes and DNA play on your Gender or Sex (check a Thesaurus, those terms are synonyms). Having a genital mutilation surgery which is what it factually is will not prevent biological men from getting prostate cancer. It won't allow for biological men to develop a womb and carry babies. This is absolute insanity to be discussing this not only as an option but as a human right that taxpayers have to pay for.

Speaking of genital mutilation didn't we put a stop to that with Muslims doing that to their children? Which I fully agree with. We should always protect the children and their innocence. But we are going to stop this practice that is claimed to be for religious reasons, and then allow it for a mental health disorder. Gender dysphoria is a body dysphoria the same as Anorexia and Bulimia. Are you affirming those ideologies or are you addressing them correctly from a mental health aspect. You think you're helping these kids by telling them they can be something that they can never fully achieve!?

The first amendment allows for free speech with the exception of "fighting words". I gotta say any reasonable parent views this bill as fighting words. My voter card will be lined with R's until you stop perverting our children to virtue signal for your party. Every action has a

reaction and parents reactions are ramping up. You need to stop attacking parental rights over party line politics! Thank you for your time, have the day you deserve.
