

Hello Committee Members, my name is Sharon Moore and I live in Hampden. I'm speaking out against LD 227.

I have given this issue a lot of thought in the last few days.

Unwanted pregnancy and mental disorders can send our fellow humans into turmoil, and we need to support them, not cut them up for profit.

As far as I can see, there are only 2 types of people who could possibly support this abuse of people, especially children and unborn babies.

One type is someone who is ignorant of what they are supporting. They don't know any of the details, nor do they care enough to find out. When presented with details, medical facts, and surgical photos, they turn their heads away. They claim they don't have time to read, watch, or listen to anyone other than the leader of the tribe they belong to. They are willfully ignorant, and refuse to learn because they are afraid that they may have been misled, and their pride can't handle that. Nor do they want to accept they are partaking in Nazi Germany-style human experiments.

The other type of person is informed, but because of being under the power of their chairperson, committee members, and lobbyists, they choose to obey so that they can stay in the club as a loyal follower of the pack. They may get that leadership position they want –if they behave.

They feel a twinge of guilt and shame, because all humans are born with a conscience. Although some may dismiss that statement as a religious one, science proves that cultures all over the world have a moral code that is accepted and enforced, even without the influence of the Holy Bible.

The second type is the most dangerous. They have given up their own souls for immediate gratification. That gratification may be seeing their name posted beside a rainbow flag, generous payments from Planned Parenthood and Big Pharma, or public adoration because they are so “enlightened.”

Well, let me enlighten you further. Maine people are learning. We are sharing information and exposing the pagan, evil practices behind these deceptive, feel-good proposals. We will continue to share what we learn, and bring facts to light, so that Maine can survive and hopefully return to being a safe, beautiful, child-friendly place to live. My heart aches for the sweet Maine I grew up in, that I no longer see.

So as I look around the room, I wonder which type of human butchering supporter you may be.

I hope that you will act according to the knowledge you have gained, and your God-given conscience, and not on fear of retribution or lack of caring to know the truth.

You will be held accountable, if not in this life, then where you will spend eternity. That’s a horrifying thought, isn’t it?
