

LD 227

Submitted by Ramsey Tripp of Gardiner

Against

There are many problems with this bill. Here are a few reasons why you should not vote for this bill.

The Governor is sworn to protect the people of Maine. This bill protects convicted criminals instead of protecting the people of Maine. It hinders the work of law enforcement and adds more bureaucracy to an already overburdened legal system. We need laws that protect Maine people and support our law enforcement agencies to do their jobs well.

Our state shouldn't be seeking Abortion and sex change surgery tourism just to make medical centers and doctors rich. The evil of this work is not healthcare any more than the holocaust was healthcare for Germany. This is about money for planned parenthood and the medical complex and enriching leftist campaigns in our state.

Calling something "Legal healthcare" Doesn't make it actual healthcare. Sucking out baby's from the safety of their mothers womb, mutilating children, cutting off healthy breasts or a healthy penis by some sick doctor is not healthcare. Whether a government says its legal or not doesn't make it healthcare and certainly doesn't make it right. We have seen this be the case in other tragedies around the world where something was legal in their country but not right. What this bill offers our state is a deeper entrenchment with the underworld.

LD 227 would allow for the trafficking of women and children into our state to legally abuse and exploit them. Do we want to be the state where our representatives vote to legally exploit children. It would seem that you do.

Please have compassion and take a stand against this evil by voting not to pass LD 227.
