

Ladies and gentleman,

thank you for taking the time to hear me today. I will keep this short and get right to the point. I commend what you are doing here today, while this brave and righteous step to protect the unborn children is a huge one, I must admit that I am severely disappointed in your lack of ability to address the root cause of this problem. Lucky for you I'm willing to share my plan to make abortions a thing of the past.

this bill would recognize that life begins at conception, and as a man, I can't emphasize how insulting that is to me. A healthy adult male will have anywhere between 40-300 million sperm present in his reproductive system at any given moment, any and all of which have the capability of blossoming into life. By saying that "life begins at conception" you completely strip us males of our responsibility for our seed and I can only perceive this as a direct attack on American Mens rights.

Why does life begin at conception? is it just a coincidence that it's suddenly when the male is out of control of the situation? I know some people will argue that this bill is just about enforcing laws to control woman as to uphold the patriarchy that benefits so many of the wealthy and our elected officials, but I see the truth. This is clearly an attack on Men and our hoard of unborn children.

now if you can't tell by now, I'm being facetious. This bill is absolute disgrace to womans healthcare and rights and every single person who supports this should be ashamed of themselves. I'm old enough to remember the ancient times of 2018 When Brett Kavanaugh was confirmed and what he had said "Roe V Wade is settled law" I heard that time and time again growing up but apparently that was just a hollow lie to help further this outdated religious thinking.

93% of abortions occur before 13 weeks, 80% occur before 9 weeks. This is not about "protecting babies" this is about controlling women and reinforcing the patriarchal system that keeps so many down. If any of you actually cared for childrens lives then you would propose something that would actually benefit them such as universal healthcare. Unfortunately our oligarch overloads won't allow you to do that so he we are, arguing over something that has been "settled law" for over 50 years. If you are not truly embarrassed by where we are as a country then you are either incompetent, or a moron.

thank you for your time,
Tony Lydon
