To the Judiciary Committee

I am a mother of 5 children, grandmother of 9, a taxpayer, a voter, and a former Registered Nurse,

This letter is concerning LD 682 on abortion, if a baby has been diagnosed "fatal fetal abnormality". I am against murdering the baby for any reason. These children have a right to be born and receive all the health care of any citizen.

As we know, doctors can also be very wrong on the diagnosis. The parents,

many times, birth a healthy baby and surgeries do correct deformities.--

Bills LD 886, 887 and 1007 are regulations for chemical abortions. Since these unsafe abortion actions are happening, women need protection from unregulated death procedures, Doctors are prescribing chemicals that are placing mothers at risk of infection, excessive bleeding, mental torture, and other health risks that lead to permanent damage and death while she is alone.

Bill LD 253 is supported by well over a majority of the people of Maine which will end tax funding of abortion (the murder of preborn babies). This will be respecting the moral convictions of the taxpayer that this is unjust and unnecessary. This IS a moral issue that can be better solved by the local community that includes the family and other necessary people. Leave out the *demonic* tools you know as ^{Planned} "Parent Fund" who are receiving unwarranted millions of tax dollars to deceive and take advantage of girls/women while making money off their abortions....

Vote your conscience after the facts are given, Thank you for the open hearing.
