Subject: Please Vote ONTP on LD 1570 -- Protect Community Water Fluoridation!

This message originates from outside the Maine Legislature.

Dear Members of the Health and Human Services Committee,

I'm writing as a health professional to urge you to vote against passing LD 1570: An Act To Prohibit Fluoridation of the Public Water As a dental hygienist who has worked in central Maine for over 30 years, I have seen a major reduction in decayed, extracted, and filled teeth due to water fluoridation.

Community water fluoridation is one of the most effective public health measures of the last century. It prevents tooth decay, reduces health disparities, and saves money—about \$20 in dental costs for every \$1 invested according to the CDC. Adjusting fluoride levels in water to support oral health is safe, thoroughly studied, and endorsed by every major public health and medical organization.

Children, especially those in low-income families, benefit the most. Fluoridation helps keep kids in school and out of pain by preventing the number one chronic disease of childhood: tooth decay.

Please support Maine's long-standing commitment to oral health, and the work of this committee over the past several legislative sessions, and vote NO on LD 1570.

Thank you for your service.

Sincerely,
Michelle Dumont
