

Chair Lawrence, Chair Sachs and Fellow Energy Consumers of the EUT Committee

I oppose LD 1936, An Act to Provide Equity in and Reduce Costs Related to State's Net Energy Billing Program

Yet another bill revealing the ugliness of power by partisan party rule. Who will they not slap down?

The PUC and Minority Party warned these energy assassins that NEB was bad policy. It favored developers over ratepayers.

Instead of heeding the warnings, these experts of taxation without representation are doubling down, unjustly handcuffing the PUC and when the ratepayers express their concerns with NEB, under the bus they will throw them, too.

Now, with malice and contempt, these green freaks command through the authority vested in being jerks that the PUC grant all developers excessive profits and hide the dastardly, collusive payment details from the ratepayers.

This bill uses terms like “revise compensation rates” and “provide owner a reasonable opportunity to earn a fair profit” and “issue a protective order”

As for the unfortunate ratepayers struggling to pay the electricity bill through no fault of their own, these self proclaimed “climatores” will capture some of them, by lottery, and and enslave them into “the program from hell” and you will have to bow down to your enslaver to get removed, and you never wanted to be in the position of having others pay your bills.

You were made to buy from two electricity markets.

This bill is cruel.

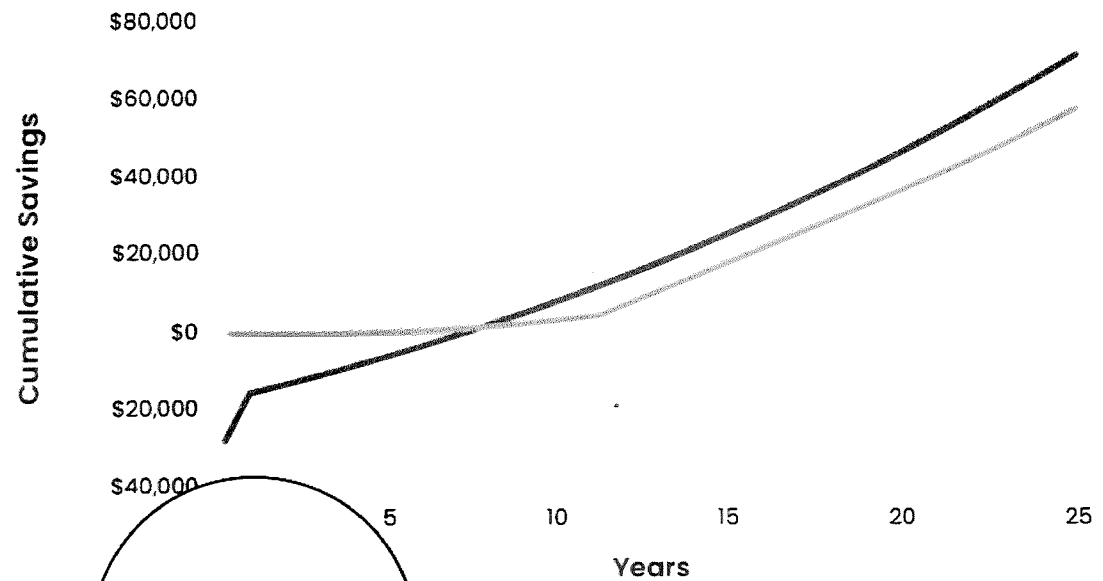

Thank You, Clayton McKay, Dixfield, the only one

Cash purchase

After the initial upfront cost, you reach your solar payback period in 7 years.

12 year loan

The project is cost neutral for the first 12 years, as you trade your electric bill for a monthly loan payment. Once the loan is paid off, you start to pocket all the savings.

Get started!
