Subject: Testimony for Id 1365

This message originates from outside the Maine Legislature.

Good morning senator Hickman representative supica and distinguished members of the vla committee. I'm writing this morning in favor of Id 1365 because we have legalized the cannabis plant in Maine yet we have left the citizens of Maine with no place to legally consume this product. It's sad to tell you but there's no legal place to consume cannabis. You can however consume hemp products that are still thc in every bar and restaurant in Maine that's currently serving thc drinks as hemp. The sky hasn't fallen and most folks haven't heard about it. So realistically it would be nice to be able to sell adult use products to these new found lounges so adults could have a safe place to smoke cannabis. We know drinking it hasn't caused any issues and I think that we should also repeal the law that fines a citizen for public consumption. I urge you all to vote augt to pass . Thank you very much for your time. Feel free to follow up with any questions. Scotty
