I am writing in regards to the intoxicating hemp bill being proposed. It needs to be addressed that full spectrum non intoxicating products are distinctly different and should be considered separately from intoxicating hemp. I am a hemp grower and produce non intoxicating full spectrum products that are for medical use. I am completely in support of addressing the issue of unregulated, out of state and intoxicating hemp products. Please don't let companies trying to make a living through a loophole take away from the many people that benefit from whole plant medicine.
