**This message originates from outside the Maine Legislature.**

As Maine residents face rising electric costs, we should be taking action to support energy efficiency and the ability of Maine residents to generate their own power. LD 1730, *An Act to Make Small, Portable, Plug-in Solar Generation Devices Accessible for All Maine Residents to Address the Energy Affordability Crisis* is an important step in that direction that I hope you will support. The ability to offset electricity costs with solar generation provides our families with protection against increasing energy costs and is clean, quiet and renewable energy. Please support LD 11730.

Sincerely,  
Carol Bennatti
