Dear Members of the Energy, Utility and Technology Committee,

I urge you to support the Act to Make Small, Portable, Plug-in Solar Generation Devices Accessible for All Maine Residents.

This bill will help in the energy affordability crisis that all Maine residents struggle with. Our energy costs are higher than in most states, and ordinary people may not be able to afford solar installations. Plus, getting permission from the electric companies is difficult, if not impossible. We need a way to reduce our energy costs. Please support this bill.
