

## Testimony neither for or against LD 2054

### An Act to Clarify the Laws Regarding Moose Hunting Permits for Hunting Outfitters

**Brandon Lane**

Owner, Allagash Guide Service

Senator Baldacci, Representative Roberts, and members of the Committee:

Thank you for the opportunity to testify today neither for or against LD 2054.

My name is Brandon Lane, and I own Allagash Guide Service, a year-round guiding business located on the border of Wildlife Management Districts 1 and 2, where the majority of our guiding activity takes place. When the lodge tag program was first introduced, I was optimistic about the opportunity it would provide for my business and for rural communities like ours. Unfortunately, I was unaware of the unintended consequences that would follow in the years ahead.

Since the program's introduction approximately five years ago, we have experienced a significant decline in the number of non-resident lottery winners contacting our business. This decline is directly tied to the reduced availability of non-resident permits. Non-resident hunters have historically made up a substantial portion of our clientele, and the loss of those hunters has had a measurable negative impact on our annual income and local economic activity.

I support meaningful reforms to this program so it can better serve guides, sportsmen, and rural communities by returning to its original intent—supporting lodges in specific areas of the state that were financially harmed by the loss of deer hunting opportunities, not creating a system that concentrates permits among a small number of operators.

Specifically, I support changes that include:

- **A 50% cap per week per WMD between lodge tags and non-resident tags**
- **No trading of lodge tags**
- **Adjacency requirements for lodge permits**
- **No selling of sub-permittee spots**
- **Only one lodge permit per lodge**, with remaining permits returned to the non-resident lottery
- **Two percent of lodge tags drawn only from bull permits**, excluding cow permits from the lodge tag allocation

As many of you are aware, the current program has been exploited to its maximum extent. This year, the Maine Warden Service issued a letter to all lodges regarding enforcement actions related to this program. In my view, the existing statute contains too many gray areas, allowing

some operators to obtain multiple permits through purchasing, trading, and other practices that were never intended when the program was created.

Another major issue is the way permits are allocated. Currently, approximately 8% of permits are designated for non-residents and 2% for lodges. While this allocation is supposed to be split between bull and cow permits, lodges are awarded bull permits only and receive zero cow permits. Despite this, cow permits are still included in the total allocation used to calculate lodge tags. This has resulted in a distorted and unequal distribution that disproportionately inflates lodge permits relative to non-resident permits.

In 2025, there were **2,645 bull permits available** across the September and October seasons. Of those, **178 bull permits** were issued to non-residents through the regular lottery, while **82 bull permits** were issued as lodge permits. This results in only **6.73% of bull permits going to non-residents** and **3.1% of bull permits issued to lodges**.

This is a valuable program, but it should not continue to be influenced by those seeking to monopolize lodge tags for the benefit of a small few. LD 2054 is a necessary step toward restoring fairness, transparency, and the original purpose of the lodge permit system.

I am happy to assist the Committee in any way and answer questions, as I am very familiar with the practical workings and real-world impacts of this program.

Thank you for your time and consideration.
