

LD 335, a bill to give 5 million annually in taxpayer funding to Planned Parenthood and Maine Family Planning.

Let's examine the underlying reasons for giving 5 million dollars in taxpayer funding to Planned Parenthood and Maine Family Planning.

Why do they need this money?

Well, this money is needed to fund their business that attempts and succeeds to help women end the lives of babies.

Does anybody think this is wrong?

Science says the preborn baby is a human being.

"DNA is present in the human body from the moment of fertilization (when the egg and sperm combine to form a full genome) throughout a person's entire life, residing in the nucleus and mitochondria of almost every cell. The body continuously maintains, uses, and replicates this genetic code within its roughly 30–37 trillion cells."

Now that means the preborn baby, from the moment of conception is a person, is a human being not a random bunch of undefined cells.

So, is it wrong to prevent the preborn baby from being born?

Thou shall not kill. We all recognize one of the most recognizable 10 commandments.

Whether you are a believer in God or not, taking the life of another human being is not an acceptable act. Our society knows it is wrong to take the life of another human being. It's called murder.

Therefore, supporting a person, persons, or in this case the behemoth organization of Planned Parenthood who gives their managers directives on how to promote abortions, which we all know is the killing of a baby a.k.a a human being due to complete DNA present at conception is wrong.

Therefore, supporting Maine Family Planning who distributes abortion pills to women without doctors' appointments with the express purpose of extinguishing the life of the preborn child is wrong.

Therefore, it is reprehensible that we would support these organizations; never mind giving them 5 million dollars a year, never mind requiring Maine taxpayers to fund it. This is wrong.

If Maine has some extra money hanging around, how about we start with life-giving care. Across Maine, we know, maternity wards and birthing centers have closed because hospitals say they lack sufficient funding. How about we support women who want to have their babies instead of those who want to get rid of their child/children. And how about we pay for counseling these women who don't want to have their child. Why? Because the majority of women who want an abortion say they have no choice – no one to support them. Let's support life giving alternatives.

Let's start making the right choices, providing and affirming life giving options, not life ending options.

LD 335 is taking us all down a path of destruction of human life.

It's not good human sense or moral sense, and it's not good business sense.
